Abstract (en)

The wheel chassis has a lift cylinder(5) linked to a cross beam (4), its piston connecting rod (6) engaging on a lifting frame (7) located height-adjustably in the basic frame (1) of the chair. Between the lifting frame and a C or U-shaped cross-section guide rail (8,9) on the long sides of the basic frame are scissor arms (10,11) whose lower rollers (12,13) are guided in the C or U-shaped longitudinal rails (17), which also function as long sides of the lifting frame. The back frame (3) is L-shaped in side view and is connected with the basic frame with its fork-shaped arms. Lateral casings (18,19) act as accommodation for exchangeable arm supports. The chair is made of refined steel.

Abstract (de)

Bei einem Kranken- und Hilfsbedürftigenstuhl mit einem Grundgestell und einem höhenverstellbaren, auf Scherenarmen gelagerten Rahmen ist zwischen dem Grundgestell und dem Rahmen ein schwenkbeweglich gelagerter Hubzylinder angeordnet. <IMAGE>
