Abstract (en)

[origin: EP0734968A1] The device has a holder, fastened to the atomizer (1), two pivoted actuator levers (5,6) and a connection part (7) for the levers. This is located under the lever pivot axis, and contains at least one flexible part. The connector has a central section (11), which projects towards the spray head (2) and is in contact with it when in rest position. The lever ends are connected by a joint (8). The connector is V-shaped, and has elastic sides (12,13). The holder has a cap (4) with apertures for the levers and for spray jet exit.
