Abstract (en)

[origin: EP0735199A1] The cutter has a frame and a carrier for at least two cutter wheels. The carrier (20) is turnably fastened in the frame, in the area of its two vertical narrow sides. In this area, it has upward projecting lever arms (22). The hydraulic elements (50) to move the carrier relative to the frame, are located in the frame in the area of the narrow sides, in a horizontal position between lever arms and cutter frame. The hydraulic elements are pistons/cylinders, which are located mainly horizontally and parallel to the vertical narrow sides.
