Abstract (en)

[origin: EP0735224A1] The operating device has a transmission element (6) fixed directly on the vent window (1) and longitudinally displaceable in a guide tube fixed on the vehicle structure. The transmission element is made of a flexible plastics with a centrally embedded steel cable (7) which projects over the end side of the element remote from the window. The transmission element can be connected rotationally secured to a motor-displaceable drive part. The drive part has at the end remote from the transmission element an axially aligned screw (11) which is connected non-detachably to the steel cable.
