Abstract (en)
The pump has a housing and a removeable insert with intake and outlet. A ventilation device (9) is fastened to the top outer edge of the housing (3). The insert (13) is located below the device, and has passage apertures (14) in the area of the device. The insert has a flange (4), which engages on the housing, and seals the pump against the heating system. The insert contains a hydraulic unit (15), forming a water-containing spiral channel. It also has channels, separated by a valve.
