Abstract (en)

[origin: EP0735310A2] The lamp has a reflector (3) with a freeform surface at the rear of the light bulb (11) and a brilliant cover disc (4) across the front opening of the lamp, coloured in dependence on the signal function of the lamp. The reflector has a circular opening receiving the lamp holder (15) for the light bulb, with an additional reflector (17) having a reflective surface (18) which bridges the gap between the edge of the opening and the light bulb.
