Abstract (en)
[origin: WO9518208A1] Described is a washing and cleaning powder containing a surfactant, cellulase and a builder and including 0.15 to 10 % by wt. of a soil-release polymer containing ethylene terephthalate groups of the formula (I) and poly(ethylene oxide) terephthalate groups of the formula (II) in which n is a whole number from 17 to 110, the molar ratio of ethylene terephthalate to poly(ethylene oxide) terephthalate in the polymer being from about 50:50 to about 90:10, the polymer further containing cellulase at a concentration of 0.05 to 1,5 IU/g plus 1 to 40 % by wt. of terpolymers composed of the monomer units of two ethylenically unsaturated carboxylic acids and/or their salts while the third monomer unit is vinyl alcohol and/or a vinyl alcohol derivative or a carbohydrate. Such powders have improved cleaning power.
