Abstract (en)

[origin: EP0736436A1] The support frame is assembled by joining a number of parallel horizontal supports (22) by uprights (20) which are sloped to the vertical. The horizontal supports carry the outer panels (32) as well as the horizontal window frames and the inner cladding. The windows are mounted between the horizontal supports and run the length of each side of the vehicle. The uprights are attached to the horizontal supports by clamping plates (36). The windows are secured with adhesive and are flush with the outer profile of the body.
