Abstract (en)
[origin: WO9517913A1] A medical infusion pump comprises a first part (10) incorporating a pump mechanism and control systems, and a second part (12) containing a fluid cassette and a flexible delivery tube (14). A latching mechanism is provided which locks the two parts together, and positions the delivery tube (14) in a position where it can be acted upon by the pump. The second portion (12) incorporating the fluid cassette and the delivery tube may be a disposable item.
