Abstract (en)
A cloth joining mechanical press which joins a piece of adhesive reinforcing cloth to the rear of a piece of textile fabric, and a humidifying installation which furnishes the textile fabric with moisture after the textile fabric has the reinforcing cloth joined thereto. Electromagnetic induction heaters, and electric conductive heating plates heated by them are located along a passage of work (W), which is the adhesive reinforcing cloth overlaid on the textile fabric, fed by using belts. A humidifying zone (5) is provided on the downstream side of a heating zone (4) equipped with the electromagnetic induction heaters and the heating plates, to thereby humidify the work (W) immediately after the reinforcing cloth thereof is joined to the textile fabric thereof. <IMAGE>
