Abstract (en)  
[origin: EP0737429A2] In the folding roof the centre of a rectangular region has a longitudinal support (11) fixed to a post (10) such that a long section (11a) and a short section (11b) are formed. A swivel arm (13) is connected to each side of the post. With an extended awning and radially stretched roof supports the swivel arm is adjusted in the longitudinal direction in the region of the shorter section (11b). Each swivel arm is divided into several linked parts.
