Abstract (en)

[origin: EP0737777A1] The invention relates to a method for surface sizing paper, wherein an aqueous solution of a degraded amylopectin potato starch is applied to the paper and the sized paper is thereafter dried. The invention also relates to sized paper with the layer of size consisting entirely or substantially entirely of degraded amylopectin potato starch. The amylopectin potato starch may have been isolated from potatoes originating from potato plants obtained through mutation or antisense inhibition.
