Abstract (en)

[origin: EP0737792A1] The hinge device, particularly for the door of household electrical appliances or the like, includes a coupling member (1), fastened to the frame structure (10) of the household electric appliance, and a support member (2) fastened to said door and pivoted, on a transversal pivot (3), to said coupling member (1). The body (7) of an elastic clamping member (8) is assembled along said support member (2); the end of this body (7) nearest the pivot (3) forms a stiffening member (14) that, in the opening position of the door, engages a stop means (18,22) formed on the coupling member (1). <IMAGE>
