Abstract (en)

[origin: EP0737793A2] The window has a skeleton construction having posts (1) and bolts (2) forming a hollow profile glass wall. The posts are interrupted at the corners of the window and the window frame (4) is inserted in the continuation of the posts and in the alignment with the bolt. The window frame has shanks (48,49) on the outside of the glass pane (12) edges for fastening the glass wall. Flat reinforcement strips (61) extend from the hollow cross-section of the window frame into the hollow cross-section of the posts.
