The gauge (8) is integrated in the carrier frame (28) of the press tongs (5) for the parcels (51), above the arms (25,26) of the tongs. The gauge consists of two conveyor belts (15,16) for the covers (13). These are in active contact with a device to advance the cover parcels (11,12) to the side walls (9,10). Slide and holder guides (47) for the covers are located between the side walls and the tong arms. Traction elements (29,30) outside the side walls move the covers along the guides onto the arms of the tongs.
