Abstract (en)
[origin: WO9615911A1] A document display stand with document pockets (20) mounted on a holder (40). The stand is modular, flexible and versatile and it is suitable for a variety of pocket formats. Said stand comprises a connecting member (30) along one side (28) of each pocket (20), and receiving means (60) on a front surface (42) of the holder (40). Each of the connecting members comprises projections (31, 31a, 31b) that are spaced apart from the clear shell of the pocket and may be inserted into front openings (63, 64) in the holder (40) in a direction (B) perpendicular to the pivot axis so that they engage at least one row of recesses (66, 67) in an axial direction (C) perpendicular to said axis. Each connecting member (30) further comprises a guiding device (32, 35) so that the pocket cannot be placed upside-down on the holder (40). Said stand is useful as an organisational tool in office environments.
