Abstract (en)
[origin: US5860373A] PCT No. PCT/DE95/00234 Sec. 371 Date Nov. 4, 1996 Sec. 102(e) Date Nov. 4, 1996 PCT Filed Feb. 23, 1995 PCT Pub. No. WO95/23253 PCT Pub. Date Aug. 31, 1995In a module with tufting tools, especially needles the tufting tools are cast with one end in a plate-shaped base. The length of the base corresponds to a multiple of the center distance of the cast-in tufting tools. The base has at least one opening which is in the form of a slot running perpendicular to the locating strip(s), which is open to the upper edge of the base. The base can be of symmetrical design and have a locating strip both at its front and at its rear locating face, serving to precisely position the module on a bar. The module and thus also the tufting tools cast into it can thus be used in two different rotational positions.
