Abstract (en)  
[origin: WO9520185A1] A document printer with a paper feed (E1, E2) handling a strip print substrate (A) of selectable configuration, with a downstream electrographic printer (DRU) which can print the strip substrate (A) on one or both sides and a post-print forms handling device connected to the electrographic printer (DRU) on the output side. Said processor has a print-page separator (V), a buffer store (ZS) to accept the separated print-pages by job and a job finisher (JF) connected to the buffer store to collate the print-pages from the buffer store (ZS) into a document.
