Abstract (en)

[origin: US5689154A] PCT No. PCT/DE95/00067 Sec. 371 Date May 30, 1996 Sec. 102(e) Date May 30, 1996 PCT Filed Jan. 20, 1995 PCT Pub. No. WO95/20822 PCT Pub. Date Aug. 3, 1995A metal halide gas discharge lamp for projection purposes includes a discharge vessel closed at both ends preferably has between the electrodes a central frosted partial area applied on the outer surface of the discharge vessel. The relationship $0.1 < B/d \leq 1$, preferably $0.4 < B/d < 0.8$, applies to the quotients of the width B of the frosted partial area by the inter-electrode gap d. The lamp is optionally provided on one or both sides with heat build-up coatings. The lamp advantageously forms a unit with an optical reflector.
