Abstract (en)
[origin: EP0741982A1] The make-up case has flat mirrors (4, 5, 6) on supports (2, 3, 7), deploying about a horizontal line when in use and folding inside the case for carriage and storage. The two outer mirrors (5, 6) of the three open on hinges with stops which limit the angle to which they can be deployed, giving the user separate views of the upper and lower surfaces of the eyes. The angle thus formed between the two outer mirrors is between 50 and 70 degrees, and pref 60 degrees. Each mirror measures between 7 and 11 cm long and 4 to 8 cm wide. The case, which comprises a hinged lid (3) and base (2) and is equipped with a sliding drawer (14) for make-up accessories, has two additional side mirrors (12a, 12b) set on ball joints (10a, 10b), and one of the main mirrors can be equipped with a magnifying glass.
