Abstract (en)

[origin: EP0742149A2] A process for obtaining bags full of products from batches of tubular net (9), which includes lowering the tubular net inside a tube (1), closing the lower end of the net, raising the same to a certain height to define a bag, filling it with a product, lowering it again, closing the top of the bag and separating it from the rest of the tubular net by shearing its top end, after providing a closure above the sheared location.
