Abstract (en)

[origin: EP0742162A1] The vessel is esp. for wine. It has an intermediate bottom separating the chambers and convex-curved towards the bottom one. The intermediate bottom (5) is butt-welded to the bottom edge of the top-chamber sidewall (2') and flush with it. At its top edge (13), the bottom chamber (7) sidewall (2'') is of smaller dia. (D1) than the sidewall of the top chamber (6). This edge is butt-welded continuously from the outside to the convex-curved portion of the intermediate bottom. The dia. of the bottom-chamber sidewall can be the same as that of the top-chamber sidewall, it being bent inwards at the top edge.
