Abstract (en)

[origin: US5799777A] PCT No. PCT/EP95/00060 Sec. 371 Date Oct. 1, 1996 Sec. 102(e) Date Oct. 1, 1996 PCT Filed Jan. 9, 1995 PCT Pub. No. WO95/21272 PCT Pub. Date Aug. 10, 1995A device for the distribution of materials in bulk comprises a chute (10) suspended from a first rotor (18) so as to be driven in rotation and to be capable of pivoting about a pivoting axis (33). A pivoting ring (38) is connected to the chute (10) so as to be capable of pivoting about an axis (36) perpendicular to the horizontal pivoting axis (33) of the chute (10). A guide means, preferably comprising a large diameter suspension bearing (52), is supported by a second rotor (40). It defines for the pivoting ring (38), in a reference frame attached to the second rotor (40), an inclined plane of rotation which makes an angle alpha with a horizontal reference plane. The pivoting ring (33) creates, during a relative rotation in this inclined plane of rotation, a pivoting of the chute (10) about the pivoting axis (33).
