Abstract (en)
[origin: WO9525318A1] In order to solve the security problem involved in handling banknotes in public places and in order to automate this handling, a machine (1) is provided formed by a security casing (2) with apertures (13) for the inlet of banknotes into the casing (2) and an aperture (7) for the output of banknotes from the casing (2); inside the machine (1) members (14-24, 30) are arranged for collecting the banknotes at the inlet aperture (13) and transferring them to stores (28) inside the casing (2), and members (14'-24', 39, 45) for collecting banknotes from the stores (28) and transferring them to the outlet aperture (7) of the casing (2); devices are also provided for counting the banknotes at input and output; conditioned enablement is provided for the command to withdraw banknotes from the machine. A desktop computer (11) is associated with the machine for controlling it and displaying counting data.
