Abstract (en)
The present invention is for a playing equipment which can also be used as an physical exercise equipment. The equipment is a new kind of seesaw. The object of the present invention is to supply an equipment with more versatile possibilities of use than those of a conventional seesaw. The semicircular parts 3a, 3b are carried by support members 4a, 4b by the two stand parts 5, 6. From the support members 4a, 4b there are protruding shaft ends along an imaginary shaft, which in figures 2 and 4 are indicated by a dashed line 8, for the swinging motion of the equipment. The shaft ends are for example by their shape in constant mesh with rubber bushings which form the damping means 7 and which are firmly mounted to the stand. <IMAGE>
