Abstract (en)

Disclosed herein is a printing medium comprising a surface layer having liquid permeability and an ink-retaining layer, wherein a pore volume of pores corresponding to a peak not greater than 100 nm in a pore diameter distribution curve of the printing medium is at most 0.015 cc/g, a pore volume of pores corresponding to at least one of peaks greater than 100 nm is at least 0.015 cc/g, and the pH of the surface layer is at least 8.
