Abstract (en)

[origin: EP0743258A2] The semi-rigid transparent or translucent plastics packaging tube (1) has one previously flattened end (11) sealed by two consecutive folds (13,14). The other tube end (10) is sealed by a base (5) in the shape of a disc glued or crimped onto the tube. The flattened end which is sealed by two folds has a band or label stuck on its two surfaces. The flattened end also has a cut out forming a slot allowing the tube to be suspended. The label is provided with perforations facilitating its tearing.
