Abstract (en)
[origin: EP0743718A1] A two-part housing (1) contains a prefabricated printed circuit transformer module allowing a lamp socket (13) to be operated from a 230 Volt network voltage. The terminal pins (6) for the transformer secondary are electrically coupled to contact springs (10), for contacting the lamp socket terminals (15), when the housing is snap-fitted to the lamp socket. Pref. the snap-fitting uses snap arms (11), which cover the lead insertion openings (16) of the lamp socket terminals when the housing is fitted to the lamp socket.
