Abstract (en)
[origin: EP0744138A1] The satchel comprises a rigid plastics shell (10) forming the surface (12) facing the back of the carrier, the base as well as at least some parts of the side walls (16). An extending textile back part (38) is connected to the rear edges of the base and the side walls of the plastics shell. The back surface (12) can be curved convex horizontally and vertically according to the back shape of the carrier. On the outside facing the carrier this back surface is spanned vertically by a flexible stretched support panel (18) fixed at its top and bottom edges to the plastics shell.
