Abstract (en)

[origin: EP0744258A2] The pressure beam (5) has two parallel profiles (11,12), located at a distance to each other. The profiles are rigidly connected via several evenly distributed studs (13), which extend at right angles to the profiles. The studs are offset to the back relative to a support surface of the profiles. The studs have cylindrical sleeve sections. Fastening elements positioned in corresponding bores in the profiles, project through the sleeve sections.
