Abstract (en)

The building plate has two parallel spaced flat cover plates (2) of sheet metal, each having several holes (3). A reinforcement element (4) in the form of a zigzag metal grid fits inbetween the plates and is welded to the relevant adjoining plate along its bent edges (4a). The cover plates can comprise flat-rolled stretched metal grid. When making the stretched metal grid for the cover plates the incisions are made in the sheet metal so that the holes remaining after flat-rolling the grid are approx. circular.

Abstract (de)

Die Bauplatte (1) aus Metall dient als Tragelement für Wandplatten, Fassadenplatten und dgl.. Sie besteht aus zwei parallel und in Abstand zueinander angeordneten, ebenen Deckplatten (2) aus Metallblech, von denen jede eine Vielzahl von Löchern (3) aufweist, und einem dazwischen angeordneten Aussteifungselement (4) in Form eines zickzackförmig gebogenen Streckmetallgitters, welches entlang seiner Biegekanten (4a) mit der jeweils anliegenden Deckplatte (2) verschweißt ist. <IMAGE>
