Abstract (en)
A clip-on support shaft for a pulley used in automobile vehicle window winders. The support shaft (10) is a part in the shape of a pan or bowl, provided with a perimetral ledge (23) that controls a wheel (9) arranged on its upper surface. The base of the bowl is occupied by a set of legs (1,2,3,4) and an auxiliary part (5) in an annex to the support-shaft. These legs become housed on the edges of windows (14,15,16) cut in the profile (II). The base also has a flexible tongue (6) which fits into one wall (12) of the profile (II). The support shaft is fixed to the profile by being clipped directly onto it. <IMAGE>
