Abstract (en)

[origin: EP0744674A2] An electronic apparatus with a vibration informing function is disclosed. When conditions for providing an alarm are satisfied, a vibration informing control circuit (102) outputs a vibration informing ON signal to a vibrating means control circuit (103). The vibrating means control circuit (103) intermittently drives and stops a vibrating means (105) via a vibration means driving circuit (104). <IMAGE>
