Abstract (en)
[origin: US5752855A] PCT No. PCT/FR95/01672 Sec. 371 Date Jul. 26, 1996 Sec. 102(e) Date Jul. 26, 1996 PCT Filed Dec. 14, 1995 PCT Pub. No. WO96/19020 PCT Pub. Date Jun. 20, 1996The invention concerns a branch connector device for a shielded cable connecting a plurality of stations of a land network. The device comprises: a junction box (Bi) comprising a housing, an electromagnetic shield (EBi) and two entries for two respective sections (Ci, C'i) of the shielded cable; a connector (Mi) comprising a plurality of contacts and an electromagnetic shield. According to the invention the housing of the junction box forms the housing of the connector; the shield (EBi) of the junction box also forms the shield of the connector; and the conductors of each section of the cable are connected directly to the contacts of the connector. Applicable to industrial data processing.
