Abstract (en)

The invention relates to colored acidic thickened aqueous compositions comprising a source of active oxygen and from 0.005% to 0.02% by weight of the total composition of an alpha or beta metal phthalocyanine dye, or mixtures thereof. Preferred compositions therein comprise a thickening surfactant system such as a quaternary ammonium compound together with a short chain amine oxide. Said compositions are particularly suitable for the cleaning of toilet bowls providing thereby enhanced perceived viscosity by the consumer and enhanced ease of rinsing perceived by the consumer.
