Abstract (en)
[origin: GB2286816A] A disposable filter bag (1) for the preparation of extraction drinks such as tea comprises an upper part (2) constituting a holder component (3) and a lower part (4) constituting an extraction chamber (5) for containing the material (10) to be extracted. The parts (2) and (4) are integrally made and are connected to each other in an area (6) around a common central axis (7) of the holder component (3) and of the extraction chamber (5) and the holder component (3) on each side of the central axis is provided with a suspension means (8) which comprises a suspension area (9) intended during the extraction to rest on the rim of the container in which the extraction takes place which suspension area (9) is produced so that it is able to receive container rims of different dimensions. <IMAGE>
