Abstract (en)  
A bracket for securing the stile to a panel of cupboard door or similar. The bracket comprises a body portion (10) on to which a runner or the like is fitted in use. A back panel (12) of the body portion (10) lies against the panel juxtaposed to the stile. Flanges (20) extend from the side of the body portion (10) which are arranged to extend between the panel and inwardly-turned flanges of the stile. Two clips (22) project sidewardly from the top end of the body portion. The clips (22) are arranged to resiliently engage on the end of the stile. A rail flange (25) extends from the top of the body portion (10) over the end of the panel to which it is fixed when installed. <IMAGE>
