Abstract (en)

[origin: EP0747915A1] The described safety switch, in particular for household appliances and the like, comprises at least one pair of fixed contacts (3), at least one movable contact (4) adapted to selectively establish and interrupt an electric continuity between the fixed contacts (3), and disengagement means (9) interlocked to a drive signal from an auxiliary circuit and adapted to selectively intervene so as to release an operation push-button (6) from the operative position in which the movable contact (4) closes the fixed contacts (3). <IMAGE>
