Abstract (en)  
[origin: EP0748011A1] A spark plug cable assembly 1 has a number of spark plug connectors 3 and ignition cables 2 which lead to each connector 10,11,12,13. The assembly 1 is seated in a channel 7 in a cam cover 5. At least one of the connectors 3 has one or more integrally moulded cable retaining clips 42,43 which are adapted to hold and retain an ignition cable 2 which leads to another spark plug connector 3. The spark plug connectors 3 have a sleeve through which the ignition cable 2 passes to make contact with a spark plug clip, the sleeve being adapted to pass through a spark plug aperture in the cam cover channel 7 so that the connector may make electrical contact with a spark plug under the cam cover 5. <IMAGE>
