Abstract (en)

[origin: DE19520797C1] The stepped arrangement of the switching devices has a carrier plate (4), a fixing strap (2) attached to the carrier plate, for securing a load switch (5) and a second switching device (6) inserted in the intermediate gap between the carrier plate and the fixing strap, so that the switching devices lie one behind the other. Pref. the ends of the fixing strap act as guide rails for an insert plate fitted in the intermediate gap, carrying the second switching device. The carrier plate is pref. provided by the front plate of a collector rail adapter.
