Abstract (en)
[origin: EP0749180A2] The connector housing has a plug housing (1) with externally mounted connecting devices (5), for serial connection with at least one other plug housing with similarly formed connecting devices, and at least one housing chamber (3) which accepts an insertable, possibly latchable, electrical contact element (4). The plug housing has at least one opening (10), which communicates with the housing chamber, on the side with the connecting devices. A locking element (9) for locking the contact element in the chamber can be inserted into the opening.
