Abstract (en)

[origin: WO9621449A1] The present invention provides a pharmaceutical composition for regulating apoptosis containing at least one active ingredient selected from the group consisting of 2,3-dihydro-1H-indene derivatives represented by general formula (I), (wherein R<1>, R<2>, R<3> and R<4> are each the same or different and are lower alkyl groups; R<5> is a lower alkoxy group; and <u>A</u> is a lower alkylene group) and salts thereof. The present invention also provides methods for treating and preventing various diseases by regulating apoptosis by use of said pharmaceutical composition.
