Abstract (en)  
[origin: WO9524460A1] The present invention relates to rinse-added fabric softening compositions comprising from about 5 % to about 50 % biodegradable softener active, from about 0.2 % to about 20 % silicone having a viscosity of from about 2 to about 5000 cSt, and the balance being an aqueous solvent system optionally containing low molecular weight organic solvents that are highly soluble in, or miscible with water. Fabrics treated with these compositions have superior re-wet characteristics.
