Abstract (en)

[origin: EP0749705A1] A shoe lower construction for e.g. safety shoes (based on EN 344/345 or DIN 4843) consists of an energy absorbing element (2) in the heel region. The energy absorbing element has a covering damping element (4), and together they form a comfort element (6). The comfort element pref. has a connected plastic linkage (18) section, with a heel region (20) and a central foot region (20).
