Abstract (en)

[origin: EP0749710A1] A work table (1) for a medical or dental laboratory has a guide rod (12) below the table (2) to adjust the work surface (7), the rod adopting an in-use and a not-in-use position. It has a horizontal arm below the table, pivoted to it about a horizontal transverse axis (17a) at the rear plus a guide element at the front. The guide element (24) slides in a path (14) which stretches horizontally (14a) from the rear forwards and then upwards (14b) in a curve. The arm is telescopic between the pivot axis and the guide element or is guided in sliding fashion into a horizontal extension (13, 16) at the rear.
