Abstract (en)
Article distribution apparatus (10) comprises means (12) defining a zone (14) through which a plurality of articles (16) can move from a first location (18) to a second location (20). Distribution means (24) extend between the first and second locations (18, 20) to divide the zone (14) into first and second lanes (30, 32). The distribution means (24) is movable laterally across the zone (14) to vary the capacity of the first and second lanes (30, 32) of the articles (16). <IMAGE>
