Abstract (en)

The storage support comprises vertical porticos (1) spaced in parallel planes. The porticos are braced by longitudinal barriers (2) and provided with fixings for complementary upper or lateral porticos or half porticos. The porticos and braces define modules which can be erected or dismantled and combined in vertical, horizontal or longitudinal extensions. The porticos have openings (8) for fitting to an upper portico. One of the portico legs (6) is provided with a socket (10) for anchoring with a lug (11) of a complementary side half portico. The brace barriers have fingers (13) which fit in vertical sockets (12) in the internal faces of the legs. A plane base (14) is provided with lugs (15) for fitting into the portico legs.
