Abstract (en)

[origin: WO9622185A1] Disclosed is a filter shell (26) of a rod-shaped flexible drainage core (4) with flow paths (5) for draining the pressed out liquid from the press chamber of a press. To mount filter shell (26) and drainage core (4) with one or both ends resting on the press, an annular bead (29) at the end of the filter shell (26) is firmly joined to the latter (26) through a looping of the filter shell (26) itself.
