Abstract (en)
[origin: EP0750861A2] The base's core has at least two compartments (21, 22). The first (21) of which is at least partly positioned under the ball of the foot. At least one filler duct (26) for inserting moulding material opens into this compartment. The two compartments are connected by at least one transfer duct (27). At least one air outlet opening (28) opens into the second compartment (22). The first compartment is closed by a cover made preferably of air permeable material and separated from the cover by an elastic, air permeable supporting layer.
