Abstract (en)
The one-piece cut-out section comprises a V-shaped grooves (15-26) symmetrically positioned in relation to the radial grooves. The radial and V-shaped grooves are in only one edge part (27). Tangential grooves (9-14) are positioned between the edge part and a middle part (8). The surfaces widen out between the tangential grooves and V-shaped grooves towards the edge (28). The cut-out piece is made of corrugated paper which is water and grease repellent and is printed. The surfaces between the radial and V-shaped grooves are superimposed and fixed to the inner or outer wall of the receptacle wall thereby produced.

Abstract (de)
Ein einstückiger Planozuschnitt (1) wird derart mit radialen (2-7) und tangentialen (9-14) Rillern versehen, daß daraus ein Gefäß faltbar ist, bei dem der Rand des Planozuschnitts den oberen Rand des Gefäßes bildet. Derartige Planozuschnitte sind zum Falten von mit Flüssigkeiten zu befüllenden Gefäßen geeignet und werden vorzugsweise aus einem wasserabweisend behandelten Wellpappenmaterial hergestellt. <IMAGE>
